Fiza Soomro

Computer Systems Engineer

Phone: +92-3333016629 | Email:fizasoomro@gmail.com | LinkedIn:www.linkedin.com/in/fiza-soomro_4730452b4

Location: Pakistan | Open to APAC Remote

Computer Systems Engineering student with a strong interest in mobile application development, cybersecurity, network security, and system protection. Familiar with basic security concepts, networking fundamentals, and security tools through coursework, labs, and hands-on learning. Motivated to learn real-world cyber defense techniques in a guided environment.

Education

Bachelor of Engineering in Computer Systems Engineering 2022 - 2026

Sukkur IBA University – Sukkur, Pakistan GPA:3.25

Intermediate (Pre-Engineering) 2019 – 2021

The GOVT: Girls Degree College, Pakistan Score:85%

Matriculation (Science Group) 2010 – 2019

IBA Public School Sukkur, Pakistan Score: 65%

WORK EXPERIENCE

Content Writer

Tech Fusion – Sukkur IBA University Jan 2023 – May 2024

- Created user-focused and technical content aligned with audience needs and communication goals.
- Worked cross-functionally with design and social teams to ensure clarity, consistency, and alignment
- Converted complex ideas into clear, structured, and accessible messaging, supporting engagement goals

Technical Workshops & Training

Co-Trainer – Generative AI Workshop 17 Feb, 2026

Computer Systems Engineering Society, Sukkur IBA University

- Conducted hands-on sessions on Large Language Models (LLMs) including Mistral, LLaMA, and DeepSeek.
- Covered LLM evaluation metrics, Retrieval-Augmented Generation (RAG), Prompt Engineering, and PEFT techniques (LoRA, QLoRA).
- Demonstrated LangChain for building LLM-powered applications.

Co-Trainer – IoT Workshop (Arduino & Raspberry Pi) 30 Oct, 2025

Computer Systems Engineering Society, Sukkur IBA University

- Delivered hands-on training on IoT fundamentals using Arduino and Raspberry Pi.
- Guided participants in sensor integration, device programming, and IoT communication techniques.
- Supervised development of mini IoT projects and practical demonstrations.

Academic Projects

- **Habit Tracker Mobile App (Flutter) (2025):** Developed a cross-platform habit tracking mobile application using Flutter.
- **Image Restoration (MATLAB)**: Implemented image restoration techniques in MATLAB using filtering methods.
- **Personality Prediction Using CV Analysis in Python:** Analyzes resumes and predicts personality traits using machine learning.
- **Smart Car Parking (Arduino)**: Developed an Arduino-based smart parking system using sensor-based detection.

Certificate

- Access Network Fiber Optic Training Program – NETS | Dec 2025
- Generative AI-Workshop- Sukkur IBA University | Feb 2026
- IoT Workshop (Arduino & Raspberry Pi)- Sukkur IBA University | Oct 2025
- Foundations of UX Design- Coursera
- Front-end Development -Freecodecamp

Skills

- **Networking & Operating Systems:**
  TCP/IP, DNS, HTTP/HTTPS (basic understanding), Linux fundamentals (file systems, permissions, command-line usage), FTTx/FTTH fundamentals, GPON basics, Optical Distribution Network (ODN) concepts
- **Cybersecurity Basics:**

Vulnerability concepts, phishing and malware awareness, incident response fundamentals, security documentation and reporting

- **Security & Network Tools (Beginner Level):**
  Wireshark, Nmap, Kali Linux (basic lab exposure), Burp Suite (basic understanding)
- **Fiber Optic & Network Testing:**
  Fiber optic fundamentals, fiber cable preparation, splicing techniques, OTDR testing, fiber troubleshooting
- **Application & Front-End Development:**
  Flutter (mobile app development), PHP, HTML, CSS, JavaScript, ASP.NET (basic), Figma (UI design), Visual Studio, Visual Studio Code, Android Studio (basic exposure)
- **Other Skills:**
  Technical documentation, reporting and analysis, attention to detail, remote collaboration
